

Amendments to the Specification:

As requested by the Examiner, applicant is submitting herewith a Substitute Specification under 37 CFR §1.125 (a) together with a hand-marked-up copy of the original specification showing the changes made to the original specification.

The undersigned affirms that the Substitute Specification only contains the changes noted in the hand-marked-up copy of the original specification and does not contain any new matter.

Entry of the Substitute Specification is respectfully requested.

Please replace the Abstract with the following abstract. For the Examiner's convenience a copy of the amended abstract is provided herewith on a separate sheet that is attached to the Substitute Specification.

ABSTRACT

A release agent for metallic ~~mold~~ molds used for forming a plastic molded ~~product~~ characterized by containing products which release agent contains a borate ester of polyoxyalkylene.
